

## PROPOSED DESIGN

Main sign is composed of individual cast metal letters, pin or stud mounted and held slightly away from the face of the limestone. Proposed finish is clear anodized aluminum. Font used is Ribbon Condensed; it is very appropriate to the age of the building. Sign is externally illuminated by fixtures mounted at the top of the limestone wall. Sign and fixtures should be sized and placed as shown in order to correspond to the existing grid of the limestone wall.

Signage next to the door consists of the logo mark executed in pin mounted aluminum or steel with a clear anodized finish, and individual plates for each of the doctors. These can be held in a frame or enclosure for changeability and security. When mounted on brick, signs should be attached through the mortar joints only. Recessed directional lighting can be installed above in the canopy.

See page 2 for examples.
